

The replacement or augmentation of failing human organs with artificial devices and systems has been an important element in health care for several decades. Such devices as kidney dialysis to augment failing kidneys, artificial heart valves to replace failing human valves, cardiac pacemakers to reestablish normal cardiac rhythm, and heart assist devices to augment a weakened human heart have assisted millions of patients in the previous 50 years and offers lifesaving technology for tens of thousands of patients each year. Significant advances in these biomedical technologies have continually occurred during this period, saving numerous lives with cutting edge technologies. Each of these artificial organ systems will be described in detail in separate sections of this lecture.

If the Shoe Fits: Footwear Analysis (The Crime Scene Club: Fact and Fiction Book 8), Coolhaus Ice Cream Book: Custom-Built Sandwiches with Crazy-Good Combos of Cookies, Ice Creams, Gelatos, and Sorbets, Testimony Of A Dreamer, When to Quit Your Day Job: A Freelancers Survival Guide Short Book, Space Travel (Out of This World (Hardcover)), The last chronicle of Basset Volume 1, Coloring Books For Adults & Kids: Animal Mandalas: Stress Relieving Patterns (Volume 14), 48 Unique Designs To Color, Eve of Passion (Wintersage Weddings Book 3), The Prince (Ad Classic),
