About three things I was absolutely positive: First, I was psychic. Second, there was a part of meâ€"and I didnâ€™t know how dominant that part might beâ€"that chose to ignore it. And third, I am unconditionally and irrevocably in love.My move to Romeo, a small, perpetually quiet town in Michigan, could have been the most boring move I ever made.  But once I met the mysterious and alluring Helmsy, my life took a thrilling and terrifying turn.  Up until now, I had managed to keep my ability a secret in the small community where I live, but now nobody is safe, especially the person I hold most dear.  Lovers find themselves balanced precariously on the point of a knife -- between desire and danger. Deeply un-romantic and extraordinarily un-suspenseful, I Become A Non-Plot captures the struggle between defying our instincts and satisfying our desires. This is a love story that didnt happen.

The ability to have any Class or Layer become non-plot would be a welcome addition, instead of only having the one NonPlot class. I often put. We took that kernel of an idea and decided to build our own, and ended up with a command that can can be used to turn almost anything into a non plotting. You would like some advice about putting objects on a non-plotting layer in AutoCAD instead of using the DEFPOINTS layer. If you have. We could use no-plot lines in any view the way we used to use Not only does non plotting need to occur, there needs to be a serious revamp.

When inserting a new block. If that block is set to a new layer that cad must create . That layer will automatically be set to a NO PLOT layer. No but ref lines can be set not to plot. What do you want to do? Maybe there is another way than what we did in CAD. This user is offline. Is there any way to create a no plot line in Revit ? what you get', so a none printable line would be invisible in the view you are printing.

It would be handy to make visible layers non-printing, but since it would still presumably be governed by the layer combinations it wouldn't.

The layers that contain the problematic linework may be set to Non-Plot. Layers set to Non-Plot will not be visible when printed.

Even if I put it on a  No Plot  level the contents still plot. I can go into the Level Manager and set the levels not to plot. That seems to be a step I shouldn't need to .
